

main.c

Run

```
1 #include <stdio.h>
2 #include <string.h>
3
4 int main() {
5     char *keyword = "hello";          // keyword to search
6     char line[256];
7     FILE *fp = fopen("file.txt", "r"); // open file for reading
8     if(fp == NULL) { perror("fopen"); return 1; }
9
10    printf("Lines containing '%s':\n", keyword);
11    while(fgets(line, sizeof(line), fp)) {
12        if(strstr(line, keyword))      // check if keyword is in line
13            printf("%s", line);
14    }
15
16    fclose(fp);
17    return 0;
18 }
19
20
```

Output

fopen: No such file or directory
